

Workflow User Experience:

- User clicks "execute workflow"
 - Input Box is presented to user with "attack type" drop down with the following options:

- Entra auth
- VPN auth
- web/network
- email

action logic:

If Entra auth - CA policy malicious IP block
 If VPN Auth - FW block inbound IP block policy and outbound IP block policy
 If Web/Network - zcaler block and inbound/outbound policy block in fortinet
 if email - block in O365, abnormal, egress defend
